

Renderguard Gold

Renderguard Gold is a high-specification plaster additive that forms an integral part of the Safeguard Damp-proofing System (BBA Certificate Number 97/3363).

Following the installation of a remedial damp-proof course (using [Dryzone damp-proofing cream](#) or [Dampcheck Plus](#)) correct re-plastering is of the utmost importance. Even though the damp-proof course is effective, hygroscopic salts introduced by the rising damp may cause moisture to be attracted to the wall. This causes further dampness and decorative spoiling, giving the impression that the damp-proof course has not been successful. It is for this reason that re-plastering following the installation of a remedial damp-proof course must perform two functions:

- It must prevent the passage of residual moisture reaching the decorative surface during the drying process.
- It must prevent the passage of hygroscopic salts from the underlying masonry to the new decorative surface in order to prevent further spoiling.

When used as an additive to a 3:1 sand-cement render, Renderguard Gold will fulfil these requirements provided that the specification is strictly adhered to.

Where the use of a hard sand/cement render is not desirable, the [Dryzone](#)

[System](#) fast-track replastering system should be considered. In many situations this system can allow rising damp treatment and redecoration to take place the same day.

The use of [Vandex Refurbishment Plaster](#) should also be considered.

Replastering Video

Further information about replastering following DPC injection can be found in the following video:

Renderguard Gold is covered by BBA certificate number 97/3363.

Renderguard Gold can be specified in conjunction with Dryzone damp-proofing cream under the following clause:

- [C45-220 \(Chemical injection DPC system\)](#)

Safeguard currently offer the following [RIBA-Approved CPD Seminars](#) free-of-charge to architects and specifiers on the UK mainland:

- [Rising Damp: Causes and Treatment](#)
- [Waterproofing Existing Basements](#)
- [Waterproofing Basements and Underground Structures \(Newbuild\)](#)
- [Dealing with Dampness in Existing Properties \(Above Ground\)](#)
- [An Introduction to Green Roofs](#)
